

10. No open shots will be permitted in excess of a standard charge of 80 pounds of 60% dynamite or the equivalent thereof.
11. Violations of any of the provisions of this permit or of any permit issued by the State Division of Fish and Game for the same area, shall result in immediate suspension of all operations on orders given by the State Lands Division inspector assigned to the project and may result in termination of the permit by order of the Executive Officer, State Lands Commission. Such terminated permit may be reinstated only by action of the State Lands Commission.
12. For each seismic crew in operation the permittee shall make an advance deposit of \$600.00 on the first day of each month of operations under this permit as a minimum deposit to defray the costs of the State Lands Division that are involved in inspection under this permit. Actual costs to the State Lands Division of such inspection which are in excess of the aforesaid minimum deposit shall be remitted by the permittee upon receipt of a statement of such additional costs.

This permit is revocable at any time by the State Lands Commission.

RUFUS W. PUTNAM,
Executive Officer.

All terms, conditions and provisions of the foregoing permit are acceptable by the applicant.

Upon motion duly made and unanimously carried, a resolution was adopted authorizing the use of the form of permit presented for the conduct of geophysical exploration operations on tide and submerged lands, for issuance pursuant to future applications subject to the existence of a concurrent permit by the State Division of Fish and Game for the conduct of such operations.

25. (East Bay Municipal Utility District - Application for permit to install an outfall sewer into San Francisco Bay - W.O. 289, P.R.C. 433) The Commission was informed that on July 26, 1919, the Commission authorized the Executive Officer to issue a permit to the East Bay Municipal Utility District, a political subdivision of the State, to install, maintain and use an outfall sewer into San Francisco Bay, bayward of the grant to the City of Oakland, for a period of forty-nine years, with the right of renewal for an additional period of forty-nine years, subject to prior approval by the State Department of Public Health. No rental or fees were required. It now appears that under Chapter 21,

Stats. of 1921, municipal utility districts were empowered "to construct works --- over any of the lands which are now or may be the property of the State" (Section 12). This includes disposition of garbage, sewage, or refuse matter. The proposed outfall sewer has been approved by the State Department of Public Health.

Upon motion duly made and unanimously carried, a resolution was adopted authorizing the Commission to rescind its action of July 26, 1919, as noted in Item 9 of the minutes of said meeting and authorize the Executive Officer to issue a permit for the land occupancy to the East Bay Municipal Utility District for a right of way 100 feet in width extending into San Francisco Bay approximately 450 feet bayward of the area granted to the City of Oakland, for such time as the right of way is in use for and occupied by an outfall sewer, at a consideration of no filing fee and no rental in accordance with Section 2021 (a) of the Rules and Regulations of the Commission.

26. (County of San Joaquin - Application for right of way easement over Middle River, San Joaquin County - W.O. 556, P.R.C. 464) The Commission was informed that the County of San Joaquin has applied for a highway right of way easement approximately 1,100 feet in length over Middle River in Sections 3 and 4, T. 1 N., R. 4 E., M.D.B. & M., San Joaquin County, approximately 12 miles west of Stockton.

Upon motion duly made and unanimously carried, a resolution was adopted authorizing the Executive Officer to issue to the County of San Joaquin a right of way easement 50 feet in width and approximately 1,100 feet in length over Middle River in Sections 3 and 4, T. 1 N., R. 4 E., M.D.B. & M., San Joaquin County for the purpose of constructing, maintaining and using a bridge and approaches thereto, said right of way easement to be for a period of fifteen years with right of renewal for two additional periods of ten years each, no fees or rentals being required. The right of way easement is to provide for reversion to the State of all lands upon termination of occupancy by the County.

27. (Public Utilities Commission, City and County of San Francisco - Right of way across San Joaquin River, Stanislaus County - W.O. 530, P.R.C. 465) The Commission was informed that the Public Utilities Commission of the City and County of San Francisco has applied for a permit to construct a new aqueduct across San Joaquin River in Stanislaus County. An existing aqueduct and an electric transmission line now cross the river between two parcels of fee right of way 150 feet in width on either side of the river. The new aqueduct will be within this fee right of way. This is a case nearly identical with the case of the East Bay Municipal Utility District as approved August 19, 1948, for such period of time as the area is in use for and occupied by aqueduct purposes.

Upon motion duly made and unanimously carried, a resolution was adopted authorizing the Executive Officer to issue to the City and County of San Francisco a permit for a right of way 150 feet in width across San Joaquin River in Stanislaus County for the installation, maintenance and use of aqueducts and electric transmission lines from Hetch Hetchy to San Francisco for such time as the right of way is in use for and occupied by aqueducts and electric transmission lines at a consideration of no filing fee and no rental in accordance with Section 2021 (a) of the California Administration Code.

28. (County of Stanislaus, Application for Right of way Easement over San Joaquin River at Grayson - P.R.C. 371, W.O. 554) The Commission was informed that on December 1, 1947, the Commission authorized the Executive Officer to issue two right of way easements to the County of Stanislaus for bridge crossings over San
