Immediate repairs are necessary on portions of the east levee of the Sacramento River, south of the City of Sacramento, that suffered damage during the recent period of high water. The proposed dredging will be a continuation of levee repair, the first stage of which was completed in June of this year. According to the applicant, it would be desirable to begin this work by September 2, 1965, in order to complete the project before the coming flood season. The Department of Water Resources will secure project approval from the Corps of Engineers, and will submit a copy of the approval to the State Lands Division. The Department of Fish and Game, and the Department of Parks and Recreation, Division of Beaches and Parks, have been notified, and have approved the proposed dredging. The Reclamation Board is the supervising agency for the project; however, the Department of Water Resources performs the work.

IT IS RECOMMENDED THAT THE COMMISSION AUTHORIZE THE EXECUTIVE OFFICER TO ISSUE TO THE DEPARTMENT OF WATER RESOURCES A PERMIT FOR THE EXTRACTION OF
