The applicant proposes to explore a number of malachite (carbonate of copper) ore outcroppings that exist on the property. According to the applicant, it will be necessary to remove much overburden if copper production is to be attained ultimately.

A field reconnaissance of the area has established that the land to be prospected is not known to contain commercially valuable deposits of minerals. The statutory filing fee of \$5 has been paid, and the permit fee of \$160 has been deposited by the applicant.

As required under Section 6890 of the Public Resources Code, the application was referred to the Office of the Attorney General, which advised that it complies with the provisions of the Public Resources Code and with the Rules and Regulations of the State Lands Commission.
