REQUEST BY SOUTHERN CALIFORNIA EDISON COMPANY
TO RELINQUISH PERMIT TO PROSPECT FOR
GEOTHERMAL RESOURCES PRC 4572.1, MONO COUNTY

PERMITTEE: Southern California Edison Company.

LOCATION: Mono Lake, Mono County (see Exhibit "A").

ACREAGE: 20 acres more or less.

DATE ISSUED: March 1, 1971.

EXPIRATION DATE: February 28, 1974.

PREREQUISITES: a. The written relinquishment, dated October 31, 1972, submitted by the permittee.

b. Compliance with terms and conditions of the permit through October 31, 1972.

PERTINENT INFORMATION:

The original Permit to Prospect for Geothermal Resources PRC 4572.1, covering 4,728 acres, more or less, was issued to Southern California Edison Company on March 1, 1971. In November 1971, Getty Oil Company, as operator for permittee, directionally drilled geothermal energy well "State 4572" 1 from State recession land of the bed of Mono Lake into submerged lands lying beneath the lake. Said well was abandoned on December 1, 1971. On February 29, 1972, PRC 4572.1 was relinquished, with the exception of 20 acres surrounding the well location. That area was held under permit pending the restoration of the wellsite. On October 4, 1972, an inspection of the drillsite was made, and it was found that all equipment was removed and the drillsite was restored to the original condition.
