ADDITIONAL TIDELAND OIL REVENUE
RESULTING FROM CRUDE OIL PRICE INCREASE

Effective August 24, 1973, the oil companies posting prices for the purchase of crude oil in California increased their offered prices 35 cents per barrel.

The Division estimates that this price rise will increase State tideland oil revenue for the 1973-1974 fiscal year by approximately \$12 million. The major portion of this expected increase in State revenue is attributable to the Long Beach granted tidelands.
