AMENDMENT OF LEASE FRC 4699.1  
AND REVISION OF LEASF RENTAL  
AFTER ROUTINE REVIEW

BACKGROUND:

In August, 1972, Minute Item C4, the State Lands Commission issued to Dow Chemical Company a 20-year right-of-way lease beginning September 1, 1972 for an 8 inch natural gas pipeline at an annual rental of \$759.04. The lease was reviewed in 1977 to set a new rental in accordance with the terms of the lease. During the review it was discovered that the area covered by the lease was not all in State ownership. The annual rent paid by Dow Chemical Company for the period September 1, 1972 through August 31, 1977 exceeded the rental which should have been paid by \$220.56 per year. Therefore, Dow Chemical Company has accrued an over-paid rental credit of \$1,102.80. Dow also made an adjusted rental payment of \$1,138.56 in 1977 pursuant to a notice of rental increase which was given in error.

CURRENT SITUATION:

An amendment has been prepared to correct the error in the legal description of the pipeline right-of-way and an appropriate adjustment has been made in the annual rental, originally proposed as part of the 5-year rental review, to reflect the new length of right-of-way on State land and current rental requirements of the Commission. Staff is arranging for a credit against future rental to Dow Chemical Company for the excess rental which has been paid pursuant to the terms of the original lease and has returned \$1,138.36 which was being held in suspense.

During the 5-year rent review the staff considered volumetric rental and determined that the volume of commodities passing through the pipeline did not justify assessing a volumetric rent.
