APPROVE SUBSIDENCE COSTS FOR
VERTICAL AND HORIZONTAL MEASUREMENTS AND STUDIES
CITY OF LONG BEACH, 1986-87 FISCAL YEAR

SUBSIDENCE PROJECT:

Subsidence vertical and horizontal measurements
and studies in the City of Long Beach Harbor
District between July 1, 1986 and June 30, 1987.

PROPOSED WORK:

The City of Long Beach Harbor Department
conducts ground elevation and horizontal
distance measurement surveys and studies twice
each year throughout the Harbor District for
the purpose of monitoring changes that may be
attributable to subsidence.

The major portion of the work effort and cost
is in the vertical measurement (elevation)
surveys and studies.

COST:

The City estimates the cost of the work to be:

Vertical Measurements and Studies	\$210,000
Horizontal Measurements and Studies	<u>10,000</u>
Total	\$220,000

The estimated cost for vertical measurements
and studies has decreased by \$40,000 over the
current year's estimate of \$250,000. The
decrease reflects anticipated lower Harbor
Department staff costs as a result of
implementing state of the art field and office
survey procedures and equipment.
