**SETTLEMENT FOR TRESPASS AND CONVERSION  
OF MINERALS, SAN DIEGO COUNTY**

**APPLICANT:** Nelson and Sloan Co.  
P. O. Box 448  
Chula Vista, California 92012.

**AREA, TYPE LAND AND LOCATION:**  
Patented, State school lands, with 100 percent  
(100%) minerals reserved to the State and  
further described as follows: The SW 1/4 of  
NW 1/4, and the N 1/2 of SW 1/4 of Section 36,  
T14S R1W, SBM, southwestern San Diego County  
excepting therefrom those lands specifically  
excluded as contained in Exhibit "A".

**LAND USE:** Extraction of rock, sand and gravel. The  
material is processed on site at a crushing and  
screening plant for production of a variety of  
salable products.

**BACKGROUND:**

Nelson and Sloan, Inc., a sand, gravel, and cement company,  
occupies a parcel of land in Section 36, Township 14S, Range W,  
SBM, San Diego County. The parcel surface was originally sold  
by the State in 1946. One hundred percent (100%) of the  
minerals were reserved to the State. Through subsequent  
conveyances, the parcels vested in Tri-Way Materials, Inc. in  
1965. None of these deeds contained the mineral reservation.  
On March 17, 1974, Nelson and Sloan entered into a stock merger  
with Tri-Way and gained ownership of the parcel.

CALENDAR ITEM NO. 39 (CONT'D)

Nelson and Sloan report that gravel has been extracted from the parcel since the mid-1960's. This unauthorized extraction of the State's minerals was discovered by staff in 1984. When presentation of the State's claim was made, Nelson and Sloan denied it.

In 1985, a lawsuit was filed by the State Lands Commission against Nelson and Sloan seeking to quiet title and receive compensation for minerals removed. A number of meetings were held with Nelson and Sloan in an attempt to settle this matter without further litigation. An agreement was reached whereby Nelson and Sloan recognized the State's title and the State Lands Commission agreed to withdraw its lawsuit for a settlement amounting to \$207,260.25 as payment for past extraction, including interest, and execution of a mineral extraction lease. This agreement was approved by the Commission on May 31, 1989.

Subsequent to this first settlement, it was discovered, through an aerial survey, that Nelson and Sloan had been trespassing since June 1986 on lands otherwise believed to be private. Further meetings were held with Nelson and Sloan and have resulted in this current settlement. Under the terms of the settlement, Nelson and Sloan will pay the State \$124,174.57, including interest, over a six-month period beginning December 1, 1989. Staff recommends approval of the settlement.

The lease approved by the Commission on May 31, 1989 contained a lease term which began on July 1, 1989. This was a technical error in that the parties intended the lease to begin June 1, 1989. Because of this error, Nelson and Sloan was assessed penalty and interest on its first quarter royalty payments because of late payment. Staff believes that because the error occurred in its document, Nelson and Sloan should not be liable for the penalty payment. Nelson and Sloan concurs and has agreed to pay interest because it also failed to notice the error. Staff recommends approval of this compromise.
