APPLICANT STATUS:

OTHER PERTINENT INFORMATION:

1. Applicant has acquired various parcels of land located adjacent to the San Joaquin River between the City of Fresno and Friant Dam that it proposes to utilize and administer as the San Joaquin River Ecological Reserve. The reserve lands have been acquired for preservation and restoration of riparian habitat and for potential inclusion in the proposed San Joaquin River Parkway to the extent the parkway is compatible with wildlife preservation and ecological reserve purposes.

The upland area, located adjacent to the lands which are the subject of this application, is identified as

CALENDAR ITEM NO. C 3 1 (CONT'D)

the Willow Unit of said reserve. When Applicant acquired the Willow Unit, it included a portion of land that is encumbered by the leasehold interest of a tenant operating a worm farm. Applicant presently contracts with the leasehold tenant for waste material that is produced at Applicant's upstream fish hatchery and utilized by the leasehold tenant in worm farming.

Because of a portion of the worm farm facilities are found to extend on to lands under the Commission's jurisdiction, Applicant respectfully requests that the Commission authorize the issuance of a one-year limited term permit, whereby such action will place the total operation of the worm farm facilities under Applicant's direct control.

Applicant proposes to exercise the degree of control over the area sufficient to operate the subject farm facilities and protect the riparian habitat without limiting the public navigation easement over the main channel of the San Joaquin River. The term of the permit is limited to one year on the understanding that the worm farm operation will be relocated to an undetermined site. Applicant will file an application with the Commission to convert the remaining worm farm structures to Applicant's use and purposes upon the expiration of the subject permit. Applicant and staff have been able to reach agreement on a number of issues concerning jurisdiction, use, and management of the area. Staff believes the subject lands can be beneficially administered by Applicant while reserving management flexibility for the Commission.

2. Pursuant to the Commission's delegation of authority and the State CEQA Guidelines (14 Cal. Code Regs. 15061), the staff has determined that this activity is exempt from the requirements of the CEQA as a categorically exempt project. The project is exempt under Class 4, Minor Alteration to Land, 14 Cal. Code Regs. 15304.

Authority: P.R.C. 21084 and 14 Cal. Code Regs. 15300.

3. This activity involves lands identified as possessing significant environmental values pursuant to P.R.C. 6370, et seq. Based upon the staff's consultation with the persons nominating such lands and through the CEQA review process, it is the staff's opinion that the project, as proposed, is consistent with its use classification.
