The Commission is requested to accept the offers to dedicate lateral access easements to the properties listed in the attached exhibit. Acceptance of these offers is part of a continuing process under an agreement with the Coastal Conservancy and the Coastal Commission for the State Lands Commission to accept easement dedications, obtained by the Coastal Commission in the

Coastal Development permit process. Staff has reviewed the offers and the properties and recommends them as appropriate for Commission acceptance.

The California Coastal Commission has, for years, required, as a condition of granting coastal development permits, formal offers to dedicate to the public, lateral and vertical access. Acceptance of the offers of dedication is time-limited to a number of years after dedication. The agreement to have State Lands accept dedications of these easements adjacent to State-owned tidelands was made to prevent the expiration of time limits and the loss of public use of the property.

The general character of the land the staff is proposing the Commission accept is dry sandy beach area, approximately 25 feet wide, parallel to the ordinary high water line and adjacent to State-owned tidelands. The Commission's liability for holding these lateral parcels is limited by Section 831.2 of the Government Code which provides that a public entity is not liable for injury caused by a natural condition of any unimproved public property. There should be no maintenance and little management required because of the lack of improvements on the parcels and because the easements simply provide beachgoers with the right to use the beach.
