**PREREQUISITE CONDITIONS, FEES AND EXPENSES:**

Filing and processing fees have been received.

**STATUTORY AND OTHER REFERENCES:**

- A. P.R.C.: Div. 6, Parts 1 and 2; Div. 13.
- B. Cal. Code Regs.: Title 3, Div. 3; Title 14, Div. 6.

**AB 884:**

N/A

**OTHER PERTINENT INFORMATION:**

1. Water quality testing performed pursuant to the United States Army Corps of Engineers and California Regional Water Quality Control Board permitting requirements found the materials to be suitable for disposal at the Alcatraz Disposal Site.
2. Questions have been raised about continuing to dispose of dredged material in San Francisco Bay. However, the current lack of an EPA/Corps-approved offshore disposal site severely limits the options available for disposal.

Through participation in the Federal/State Joint Long-Term Management Strategy being conducted to identify and evaluate site options for the disposal of material dredged from San Francisco Bay, the State Lands Commission has emphasized the need to focus on the selection of ocean disposal or non-aquatic site(s). This need has also been expressed by the San Francisco Bay Conservation and Development Commission (SFBCDC).

Identification and evaluation of alternate disposal sites will require numerous studies which have been estimated to cost several million dollars. As ongoing in-bay disposal contributed to the eventual obsolescence of in-bay sites and exacerbates the need to develop other alternatives, a fee will be charged as a condition to the proposed permit to be deposited in a fund to offset the cost of needed studies.

CALENDAR ITEM NO. C32 (CONT'D)

Given the necessity of the proposed dredging in order to maintain navigability and the time constraints imposed in the interest of protecting the fishery resources, staff recommends authorization of the proposed dredging and disposal.

3. The SFBCDC, a "functional equivalent agency" under Section 21080.5 of the CEQA has:
  - a. served as the lead agency under CEQA;
