CALENDAR ITEM NO. 53 (CONT'D)

**OTHER PERTINENT INFORMATION:**

1. Applicant operates a campground on the uplands and has a lease for a boat-launch ramp and debris deflector.
2. Applicant has been discussing establishment of a marina at this location for a number of years with two substantively different configurations. Two years ago, a formal application was made to the Commission.
3. After performing an Initial Study for the proposal, staff determined that an Environmental Impact Report would be necessary to address several potential significant environmental impacts that were identified.
4. Applicant has attempted to redesign the project and to avoid some of the impacts; however, after review, it is still the staff's belief that an EIR is necessary. Applicant disagrees with this position.
5. The Permit Streamlining Act requires that once an application has been accepted as complete, the Commission must act on the application within specified time periods. Failure to act within the time allowed, either by approving or denying the project, could result in approval of the project. To date, staff and the applicant are not in agreement as to the need for and scope of an EIR for the project. The provisions of the Permit Streamlining Act, as they apply to the application, necessitate Commission action at this time. Staff proposes that the project be denied without prejudice. Should the Applicant wish to proceed with the project, he may reapply to the Commission for the necessary lease. Applicant has been advised that, should he choose to reapply and agree to the preparation of an adequate EIR, he still may not succeed in acquiring a Commission lease. Staff remains concerned that the potential impacts of the proposed project may not be able to be reduced to an insignificant level, and that the project may be found to be an inappropriate use of the subject State-owned lands.
