State Lands Commission

**BACKGROUND**

This calendar item recommends modifying certain provisions of a Litigation and Title Settlement Agreement (Agreement) approved by the Commission at its meeting of March 27, 1990 and entered into between the State of California (acting by and through the State Lands Commission), the City of Stockton, Grupe Development Company, Reclamation District 2074, and other involved property owners.

The Commission subsequently amended the initial Agreement by approval of Minute Item 56, at its meeting of May 5, 1992. This first amendment extended the period of time for pathway construction along the Calaveras and San Joaquin Rivers to no later than March 31, 1993.

The land involved is located in the western portion of the City of Stockton. The specific area was historically known as the Sargent Barnhart Tract, and more recently, as "Brookside." The area is shown on Exhibit A and is bounded on the north by Fourteen Mile Slough (formerly Twelve Mile Slough), on the northwest by the Ten Mile Slough levee (formerly Connection Slough), on the southwest by the San Joaquin River, on the south

by the Calaveras River and on the east by the Smith Levee and earlier development.

**PROPOSED MODIFICATIONS**

Grupe Development Associates has applied with the City of Stockton for a tentative map consisting of 86 residential lots located in the most northern area of Brookside (see Exhibit B for location map) adjacent to the Fourteen Mile Slough waterway. According to the Agreement, public access must be provided along Fourteen Mile Slough as follows (see Exhibit "C"):

1. Bicycle path and Public Recreational Easement for 1,000 feet along Fourteen Mile Slough levee west of Smith Levee. This easement is a dead end easement with access from the east end only.
2. Two T-shaped Public Recreational Easements connecting the nearest Brookside roadway to the Fourteen Mile Slough levee. The T-shaped easements are 8 feet wide from the roadway to the levee and 15 feet wide on the levee. The accesses would be used by the public for viewing, fishing and the launching of small non-motorized boats.
3. An 8 feet wide Public Access Easement located in the most northwesterly corner of Brookside. The easement connects the future Brookside street to the Fourteen Mile Slough levee via the Ten Mile Slough levee. This easement shall only be accessible by the public if a Public Access Easement is acquired on the lands west of Brookside.

One of the T-shaped Public Recreational Easements falls within the currently proposed 86 lot subdivision. The subdivisions to be located adjacent to these easements are all planned to be security gated with private streets. Due to the complexity of providing access through these private areas to the easements, Grupe Development Associates proposes to modify the Agreement as follows (see Exhibit D):

- #1. Extend to 1,300' from 1,000' the bicycle path and Public Recreational Easement along the northeastern section of the Fourteen Mile Slough levee. This would provide 300 additional lineal feet of public access along the waterway.

CALENDAR ITEM NO. C46 (CONT'D)

- #2. Provide public pedestrian access to the western end of the 1,300' Fourteen Mile Slough easement through the future subdivision located south of the termination point of the 1,300' easement. Public access will be allowed during daylight hours thus providing a circuitous route of ingress and egress to the levee.
- #3. Construct a 12' wide bicycle path and provide a Public Access Easement from the intersection of Brookview Drive and Riverbrook Drive westerly through the PG&E easement to the Ten Mile Slough levee for future connection to lands west of Brookside.
- #4. Delete the two T-shaped Public Recreational Easements on Fourteen Mile Slough and the 8' wide Public Access Easement located in the northwestern corner of Brookside.

The City of Stockton is in support of the elimination of the T-shaped Public Recreational Easements and the northwestern Public Access Easement in exchange for items #1 and #2 as detailed above. As an additional incentive, Grupe Development Associates is also offering #3 in exchange for the modification request. The easement in #1 above will be conveyed to the State in exchange for the easements to be eliminated as described in #4 above.

  - D. THAT THE PROPERTY INTERESTS TO BE CONFIRMED TO THE PROPERTY OWNERS OF RECORD WILL NOT SUBSTANTIALLY INTERFERE WITH PUBLIC TRUST NEEDS OR USES OVER THE PROPERTY AND THAT THE COMMISSION RETAINS THE PUBLIC'S RIGHTS AND AUTHORITY OVER THE PUBLIC TRUST EASEMENT WITHIN THAT AREA.
